AWARDS AND ACHIEVEMENTS

MERN Stack Certification
TuteDude

Achievements/Tasks
- Link : https://ucarecdn.com/9d03344f-b95f-47ba-847c-998866929010/
- Learned the MERN stack by building simple full-stack projects using MongoDB, Express.js, React.js, and Node.js.
- Created REST APIs and used basic state management in React to improve user experience and functionality.

PERSONAL PROJECTS

Food Delivery Website (08/2024 - 09/2024)
- Developed a responsive food delivery website using React and MongoDB, focusing on faster load times and a smooth user experience. Integrated a secure payment system and added real-time order tracking, which improved the checkout process and reduced user issues.

Note-Taking Application (07/2024 - 08/2024)
- Created a user-friendly note-taking app with features like secure login and real-time note syncing across devices. Focused on data privacy using encryption and tokens, and ensured a smooth experience with consistent, real-time updates.

E-commerce Platform (02/2024 - 03/2024)
- Designed an e-commerce website with user-friendly navigation to improve the shopping experience. Built a clean and easy-to-use interface for browsing products and categories, and added product recommendations to help users find what they need and boost sales.

CERTIFICATION

Mern Stack Developer - Futuremind Infotech Solutions (04/2025 - Present)
